

1 PRICING OF BALANCE GAS

At other times than during National Balancing, and to the extent possible in case of National Balancing, Balance Gas will be priced according to Annex 6, section 17.2. In other cases during National Balancing Swedegas has the right to price Balance Gas to actual and documented costs.

2 ENERGY CONSUMPTION CHARGE

A total fee of SEK 4,000,000 per year is charged by the Balance Administrator. The total fee is divided between the Delivery Months as follows (SEK):

January	540,000
February	500,000
Mars	460,000
April	320,000
May	220,000
June	160,000
July	140,000
August	160,000
September	220,000
October	320,000
November	440,000
December	520,000

The Energy Consumption Charge for a Delivery Month, in SEK/MWh(u), is the fee for that Delivery Month divided by the total consumption within the Western Sweden Natural Gas System. The fee is charged for consumption during the Delivery Month for which the Balance Administrator has Balance Responsibility.

The Energy Consumption Charge for a Delivery Month is determined early in the month following the Delivery Month. Since Swedegas at that time does not have all the final values for the Delivery Month, the monthly amount will differ somewhat from the amount listed above. This difference is corrected in the next Delivery Month.
